VALUE OF PRODUCTION ^{1/ 3/ 4/}

Principal Crops

Million Dollars

Million Dollars

^{1/} Principal crops include corn for grain, soybeans, winter wheat, hay and tobacco. ^{2/} Crops included in area planted are corn, soybeans, winter wheat, hay and tobacco. Harvested acreage is used for all hay and tobacco instead of total area planted. ^{3/} Value of production is computed by multiplying the marketing year average price by production. Value of production estimates relate to the crop year. These estimates should not be confused with cash receipts, which relate to sales during a calendar year irrespective of the year of production.

^{4/} Beginning crop year 2000, oats was dropped from Principal Crops and soybeans was added.
